About Us

Apex Fencing Ltd has over 25 years of experience. We –a couple of guys who began the company in our backyard in Auckland–, shared a great and ambitious idea: **Improving New Zealand one fence at a time.**

Apex Fencing Ltd is based in Silverdale and services the whole of Auckland surrounding areas. With over 25 years of experience, we've been accomplishing the goals envisioned in our backyard many years ago by giving the best fencing and manufacturing services available in the area. Most importantly, we've managed to become a key partner to the fencing projects of all of our clients.

We are proud of what we do. Our carefully chosen premises are ideal for our team operations. We have gained the opportunity to manufacture all custom-made fencing products in-house. This allows us to

make sure we offer you, our client, the best quality products and cost-effective service. Apex Fencing Ltd exists to give you a total fencing project solution. From in-house design and fabrication to our frontline installation crews. Everyone at Apex Fencing Ltd works together to make sure things run smoothly on your project, and you end up completely satisfied.

At Apex Fencing Ltd, safety is at the forefront of our operations. We are continuously investigating our installation processes and strive to find ways to improve the safety aspects on each process.

► Accreditation

You'll remain stress-free as we can be your trusting partner and solve all of your fencing project requirements. From start to finish. From design, Fabrication, all the way to installation. You don't have to worry about anything. We'll take care of all the stages of the process alongside you. Your project will be done in time and on budget thanks to our in-house manufacturing which also ensures the quality of fabrication while remaining cost-effective. We also offer you some of the best fencing prices, as well as quality and good-looking fences.

Our dedicated team of experts are eager to provide you with the best service and quality workmanship. We are well informed on The Fencing Act and can advise your project requirements for compliance. Just talk to us, and we'll guide you all the way through.

Apex Fencing Ltd longs to be a key partner in your fencing needs!

Residential Fencing

The big benefit of Apex Fencing Ltd is that we will work with you to see what you want and how we can make it to suit your property and requirements.

We will work with you to choose the fence most suitable for you, and we will ask you to define precisely the functions you expect it to perform. A fence can fill several functions at once: it can be both elegant and stylish and at the same time prevent unwanted visitors from entering your property; it can hide your home and protect your privacy and at the same time be functional and un-intimidating.

By selecting the most appropriate design style for your fence and gate, we will add value to your property.

"They were great to communicate with and patient and professional about our awkward neighbour"

- Megg Moss

Commercial Fencing

In Apex Fencing Ltd, we specialise in Commercial Fencing for factories, warehouses, shops, or any kind of valuable commercial property. As experts in the fencing industry, we are well-aware of how important it is to protect your commercial business!

Apex Fencing Ltd provides you with the best security solutions to meet your specific project requirements. We are ready to help you all the way by designing the fencing solutions better suited for your property or properties. We custom-make our gates and fences in-home in order to ensure quality, effectiveness, and control of scheduling so that it meets your demands. Our installation crew will make sure this project will leave your business perfectly safe and protected.

"Attention to detail is fantastic, I highly recommend these guys"

- Rikki, Henderson Demolition

Park and School Fencing

We understand the importance of providing the right amount of protection for our children in schools. Because of that, Apex Fencing offers services to schools and kindergartens with knowledge of the industry requirements. We can source many different panels to suit your requirements, including matching existing fence panels. We are familiar with anti-climb fencing options and offer a variety of school and kindergarten fencing and gate options to comply with your needs.

Our fencing options help protect and also ensure the safety and security of park users in play areas located in open spaces. Our team of designers can work alongside urban planners and architects to create beautiful and functional areas for the different types of parks. If you're a developer, you will find it satisfactory to partner with us as your fencing project will be completed in time, on budget, and without any stress.

Apex Fencing can also provide Timber fencing options to meet your requirements, such as acoustic fences to keep noise levels down. We have a range of bollard and swing gate options for parks and schools, to keep cars in and out of desired areas.

Apex Fencing Ltd is eager to play a part in increasing the standards of living in our community. Contact us so that we can guide and advise you for what can work better for your park or school.

Security and Chainlink

Apex Fencing specialise in creating security fences to protect your personal and commercial assets, chainlink security fencing is an entry level solution that will provide security at a reasonable price.

This type of fencing is very popular and largely used around New Zealand because of its versatility and ease to install large runs in a short timeframe. There are options to add a top and bottom rail to make the fence more robust and can even be provided in a PVC coated option for less of a commercial look.

Chainlink fencing can be taken from an entry level security product at 1.8m high, to a high level of security by increasing the height to 3.6m, increasing the wire thickness, adding barbed wire, razor wire or even electric fencing, all of which Apex Fencing are experienced in.

In addition to the supply and install of your chainlink fence, Apex Fencing will also fabricate a gate to meet your specific needs, whether it be a standard sliding gate or a complicated swing gate with rising hinges and automation, our team will provide the solution you require and our installers have the experience to make sure that the gate operates to perfection.

Civil and Infrastructure

We can help with your perimeter fencing and balustrade barriers for sub-divisions, roads, railways, bridges, walkways & cycleways and many others. These fences and barriers are essential for the safety of our communities.

At Apex Fencing, we understand the requirement to install fencing for pedestrian safety. Our team can help design fencing to limit access to roads, railways and other restricted areas where accidents might happen.

We understand all the legal requirements for fencing development and can help advise on these matter for your project.

We pride ourselves in getting involved in all stages of Civil and Infrastructure fencing projects. We have in-house experts to work with you on your project, able to advise on the specific necessities you need to cover. We can work alongside engineers and urban planners to achieve the desired design for the fences of your project. We have gained the opportunity to fabricate our products in-house, which allows us to take care of their quality while maintaining them cost-effective. Our crew of expert installers will finish the job to your satisfaction.

Apex Fencing is familiar with the Falling from Heights Act and can guide clients with the right products and information to comply with such. With 25 years of experience, we're the perfect choice to develop your Civil and Infrastructure fencing projects. So, contact us and let us partner with you to achieve the best results for your fencing project.

Some of our available products and services include:

- ▶ 1300H motorway panels in desired finishes such as hot-dip galvanized or in preferred powder coated finish.
- ▶ Balustrade fencing options available at 1.1m and 2.4m centers —with in-ground options—, flanged or side fixed to retaining walls.
- ▶ Folded pool panels used through a subdivision in galvanized, epoxy, and powder-coated options. Range from 1.2m to 1.8m high.
- ▶ Timber fencing, including standard close board palings, acoustic sound fences, and laminata options.
